Borough Engineer’s Report
1. Wexcon has begun Church Street project with initial placement of inlets. Wexcon’s progress is affected by Columbia Gas street work. Wexcon has requested a time extension of at least September 2013, to complete phase one of the project. R. Apgar moved to authorize Wexcon to continue the Church Street project into September, 2013, seconded by L. Cadwallader. Motion carried.
2. J. Brenneman provided an aerial photo of 101 Manchester Street and discussed his estimate of stormwater work for said property, if Council determines this work is the borough’s responsibility. The solicitor completed a simple deed search; this property is a parcel from a Pace Subdivision from 1979. Council decided to table a decision,
and asked the Work Supervisor to contact Dennis Copp and the adjoining property owner, Soimita Persa, to determine if added stones are blocking the flow of water from the storm water pipe.

3. The Borough received notification from NTM Engineering, Inc., regarding York County’s planned bridge replacement of the Valley Street Bridge, proposed work to begin in the spring of 2016. Because the project is located in an approved Act 167 Stormwater Management Plan watershed, NTM Engineering is required to request a Stormwater Management Consistency Letter, as part of PADEP’s Chapter 105 permit application. Council may or may not send a consistency letter. B. Wetzel made a motion to not authorize the engineer to send a consistency letter, seconded by R. Apgar. Motion carried.

4. Holley & Associates is the engineer for E-Squared, the owner of the second phase of Field of Broad Springs located in Shrewsbury Township. On May 26, 2009, J. Brenneman sent a letter to GRB, which stated that E-Squared would contribute $5590.00 for requested base repair, milling and the overlay of Camp Street; Council accepted this offer but never sent a letter to E-Squared (June 17, 2009). E-Squared never contributed $5590.00 to the Borough. J. Brenneman is requesting the written letter of acceptance. Council asked J. Brenneman to assess whether there will be additional costs since the decision was made four years ago. The Work Supervisor and Engineer recommended placing a base on Camp Street now and then installing final wearing course when the development is completed.

*J. Brenneman left the meeting at 7:52 P. M.
